Website	

COMPANY SITES [in-house]

Please indicate all the sites belonging to your company/group involved with European Flax™ materials and products. All sites involved with certified materials must become European Flax™ certified or join the multisite certificate of their parent company. This applies to production sites as well as offices or head offices involved with invoicing or administrative work related to European Flax™ products.

	Company name	Address [street, zip code, city and country]
Site 1		
Site 2		
Site 3		
Site 4		
Site 5		

SCOPE PER SITE [in-house]

Please select from the list of scopes below the products related to the roles and activities performed by your sites and that you wish to include in your European Flax™ certification scope.

Role	Activity [in-house]	Product	Site 1	Site 2	Site 3	Site 4	Site 5	
FIBRE PRE-PROCESSING	Long fibre hackling	Hackled long fibre sliver Hackled short fibre						
	Short fibre rescutching	Rescutched short fibre Rescutched and cut short fibre						
	Short fibre carding-combing	Short fibre carded sliver Short fibre carded and combed sliver						
	Cottonising	Cottonised fibre Cottonised and carded fibre						
SPINNING	Preparation to spinning long fibre	Roving						
	Flax wet-spinning	Boiled Linen yarn Boiled and bleached Linen yarn						
	Flax dry/semi-dry spinning	Natural Linen yarn Prebleached Linen yarn						
	Open-end cotton-type spinning	Yarn						
	Ring cotton-type spinning	Yarn						
	Wool-type spinning	Yarn						
YARN FINISHING	Yarn dyeing	Dyed yarn						
	Yarn finishing	Finished yarn Fancy yarn finishing						
WEAVING	Weaving	Woven fabric Loomstate woven fabric						
	Lacemaking	Lace						
KNITTING	Trim-making	Trimings						
	Flatbed knitting	Knitted end product						
FABRIC FINISHING	Circular knitting	Knitted fabric						
	Dyeing	Dyed textile						
	Various finishing	Finished textile						
	Embroidering	Embroidered textile						
END PRODUCT MANUFACTURING	Printing	Printed textile						
	End product manufacturing	End product						
END PRODUCT FINISHING	"Garment-dye" processing	"Garment-dyed" end product						
	Various finishing	Finished end product						
	Embroidering	Embroidered end product						
	Printing	Printed end product						
PRODUCTION FOR TECHNICAL USE	Fibre preparation or production of coproducts for technical use	Semi-finished product for reinforcement						
		Insulation						
		Shives particleboard						
		Non-woven Technical fibre						
	Non-woven production	Non-woven						
		Production of semi-finished products for reinforcement	Multiaxial [non-crimp] Prepreg Unidirectional Roving Yarn for composite Woven for composite Grid Braided composite Knits for composite					
	Composite processor	Laminate composite						
		Composite finished product Prepreg						
	TRADING	Fibre trading	Flax long fibre					
			Flax raw short fibre					
Flax half-scudched short fibre								
Flax scudched short fibre								
Hackled long fibre sliver								
Hackled short fibre								
Rescutched short fibre								
Rescutched and cut short fibre								
Yarn trading		Short fibre carded sliver						
		Short fibre carded and combed sliver						
		Cottonised fibre						
		Cottonised and carded fibre						
		Roving						
		Boiled Linen yarn Boiled and bleached Linen yarn Natural Linen yarn Prebleached Linen yarn Yarn Dyed yarn Finished yarn Fancy yarn						
Fabric trading	Woven fabric							
	Knitted fabric							
	Loomstate woven fabric							
	Lace							
	Trimings							
	Dyed textile Finished textile Embroidered textile Printed textile							
End product trading	Woven end product							
	Knitted end product							
Warehousing [in-house]								
OFFICES	Invoicing & administrative work							
Additional information on the activities your company performs in-house								

TRADERS [if applicable]

By Trader we mean a company buying certified materials or goods and selling them without performing any transformation in-house or subcontracted.

Does your company take physical possession of European Flax™ certified materials/goods?	
--	--

SUBCONTRACTORS

Using a subcontractor means outsourcing a work on European Flax™ certified materials. Purchase and sale of certified products are managed by the contracting organisation, not the subcontractor. The material remains the property of the contracting organisation. Invoicing between the subcontractor and the contracting organisation is only related to the outsourced activities.

In European Flax™, companies that have common ownership with yours cannot be your subcontractors unless they are certified themselves. They can become European Flax™ certified on their own, or as part of a multisite certificate, in which case they must be added to the list of your in-house sites [section above].

NB: By common ownership, we mean an ownership structure where one of the organisations holds a stake of more than 5% in the other organisation.

Do you subcontract certain processing activities for the Flax-Linen products you want to certify as European Flax™?	
Do the subcontractors processing your Flax-Linen products have a common ownership link with your company?	

SUBCONTRACTORS SITES

Please list all the subcontractors you wish to work with on your European Flax™ certified products.
The certified contracting organisation is the subcontractor's guarantor and must therefore have a contract with their subcontractor, carry out internal audits of their subcontractors yearly and produce audit reports for verification by Bureau Veritas. Some subcontractors may be audited by Bureau Veritas depending on the level of risk of fibre blending related to their activities.

	Company name	Address [street, zip code, city and country]	European Flax™ certificate number [if applicable]
Subcontractor 1			
Subcontractor 2			
Subcontractor 3			
Subcontractor 4			
Subcontractor 5			

SCOPE PER SUBCONTRACTORS

Please select from the list of scopes below the products related to the roles and activities performed by your subcontractors and that you wish to include in your European Flax™ certification scope.
[S = Subcontractor]

Role	Activity [subcontracted]	Product	S1	S2	S3	S4	S5
FIBRE PRE-PROCESSING	Long fibre hackling	Hackled long fibre sliver Hackled short fibre					
	Short fibre rescutching	Rescutched short fibre Rescutched and cut short fibre					
	Short fibre carding-combing	Short fibre carded sliver Short fibre carded and combed sliver					
	Cottonising	Cottonised fibre Cottonised and carded fibre					
SPINNING	Preparation to spinning long fibre	Roving

		Shives particleboard					
	Non-woven production	Non-woven					
		Production of semi-finished products for reinforcement	Multiaxial [non-crimp] Prepreg Unidirectional Roving Yarn for composite Woven for composite Grid Braided composite Knits for composite				
	Composite processor	Laminate composite					
		Composite finished product Prepreg					
	WAREHOUSING	Warehousing					

COMPOSITION TEST

Processors shall carry out composition tests [norm Alliance Bast Fibre Observatory ISO standard #20706-1, dec.2019] from their second year of certification on [first surveillance audit].

Would you like to carry out composition tests with BVCPs and include this cost in your certification contract with Bureau Veritas?
